

Step E – assemble src_map

in: entity · f1065_data · is_data
· bs_data · owners
out: src_map
{'IS'|'BS'|'entity'|'F1065'|'owners'
→ dict}

_resolve(source, path, src_map)

in: source key (e.g. 'IS')
dotted path (e.g.
'rent_income')
walks path into
src_map[source]
out: raw value (float | int
| str | None)

_fmt(v)

in: raw value
float → '#,##0.00' · 0.0 → "
out: PDF-ready string (or
None)

fillDict[fid].update({...})

sets publish=True · source
· path · note · value
out: fillDict entry updated
in-place
